U. S. FLYERS GET 40 ACRES LAND FROM POLAND

(By Associated Press.)
WARSAW, April 21.—Nine American members of the Kocuzsko air squadron, all soldiers of fortune, recently were awarded 40 acres of land each, near the Polish-Russian frontier as outlined by the Riga peace treaty.
All officers and soldiers of the Polish forces are being provided with tracts along Poland's eastern boundary under a system worked out by the government, provided they like up cultivation of the land upon leaving the military service. By this plan, Poland hopes to have trained men settled permanently where they would be handy for service in case the country is ever attacked again from the east.
Most of the young men of the Kocuzsko squadron are planning to return to America during the summer. If they do not settle upon the land within a specified time, their rights to the farms will be forfeited. As yet none of the Americans has made up his mind to settle down on a Polish plot and lead the life of a peasant. Several of the Americans were reared in the country but they say the excitement of time and the thrills of war have spoiled them for the back-to-the-farm movement.

MAKE READY FOR RUSH TO NEW OIL DISTRICT

(By Associated Press.)
EDMONTON, Alberta, April 21.—Activity in Alberta in preparation for the spring rush to the oil fields at Fort Norman is gathering headway and the entire province is in a state of feverish excitement.

Transportation companies are having steamers and barges built for operations on the Athabasca, Slave, Peace and Mackenzie rivers, and the Great Slave lake. One company is having lumber shipped to Fort Smith, north of here on the Slave river, for the construction of a barge using oil burning engines. The oil would be obtained from Fort Norman where a well, gushing 1000 barrels an hour, was brought in recently.

Scores of applications for charters to do business in Alberta and points north show that capital is taking no little interest in the new field. New companies are being organized daily here and in other Canadian cities. Seventeen are reported to have been incorporated in Toronto alone, and advice from Montreal and Vancouver show equal eagerness in those places.

By far the greatest activity is centered at Fort McMurray, on the Athabasca river, north of Edmonton. With 50 teams working in 24-hour shifts, moving stores over the 20 miles that separates Fort McMurray

from the railroad, great piles of freight are being erected, awaiting shipment into the oil country.

A feverish energy is being displayed and more than 800 tons of freight is piled indiscriminately on the right of way of the waterways terminal and the volume grows steadily as each train brings in additional supplies. The hundred inhabitants of Fort McMurray are virtually all engaged in assisting in the movement of the shipments.

Many companies have their own outfits moving their freight while every privately owned team that can be employed is on the job.

Nearly every conceivable commodity is included in the heterogeneous piles of freight around the terminals, though heavy drilling machinery and saw mill and engine supplies are chiefly in evidence. The bulk of this tonnage must be moved to the landing on Athabasca for transportation to the Arctic oil zone before warm weather softens the ice roads over the muskegs. Otherwise transportation will be held up until the road dries up.

Labor at Fort McMurray is an uncertain quantity and jobs are going begging at \$6 a day. With the opening of summer, however, the men now engaged in fur trapping will be available.

PRINT PAPERS WHILE FLYING

(By Associated Press.)

LONDON, April 21.—Initial trials will soon be made in the publication of a daily newspaper from airplanes in flight, a new phase of journalism.

Airplanes will leave Paris and London daily. Machines from Paris will print editions of the Aerial Mail in French and those from England will print their copies in English. Batches of the papers will be dropped by parachute in Boulogne, Rouen, Amiens and other cities where there are subscribers, says the Daily Mail.

The machines will be equipped with wireless in addition to complete printing plants and will issue news of politics, finance, sport and that of a general character.
